Senior Electrical Engineer - Cork

MEP is a M&E Engineers & Project Managers engineering services firm. The company has gained a reputation for delivering a high level of service to our multinational clients in the Pharmaceutical, Medtech, Food, Industrial and Commercial clients with a capability to deliver projects up to €50m

The role fulfilled by MEP includes full Project Management and M&E engineering of all project stages, including feasibility, schedule, conception, detailed design, tendering, construction management, cost control and handover.

A Project Manager leads every project and brings together a team with the relevant skills, experience and knowledge, either wholly from within the practice or with the addition of external specialists to provide an individually tailored service.

The role of Senior Electrical Engineer is crucial to the team and has an integral part to play in each project.
